2026 Green Power Summit

VISION 2030: CLEAN AND SUSTAINABLE
ENERGY FOR ROMANIA

The 4th edition of the GREEN POWER SUMMIT - Vision 2030: Clean and Sustainable Energy for Romania, dedicated to promoting and developing sustainable energy sources in net-zero world, is slated to take place on October 20 at the JW Marriott Bucharest Grand Hotel. The event brings together once again leading energy experts and highly skilled professionals, who will share their experience in ground-breaking technologies, strategies and investment programs.

This high-level communication platform for senior management and top executives in Romania's energy sector encourages collaboration and discussion to solve problems within the industry.

Forecasts for a Greener Future

Romania has set ambitious targets in its official strategies: reducing net emissions by 85% by 2030 and achieving climate neutrality by 2050, according to the updated Integrated National Energy and Climate Plan (INECP).

By 2030, Romania forecasts over 10 GW of solar energy, 6.5 GW of wind energy, 4 GW/10 GWh of batteries, and over 70% of electricity consumption from low-carbon sources (TDP study). Romania has already made significant progress, achieving by 2022 85% of its 2030 target for net GHG emission reduction, with a projection of reaching 93% of the 2030 reduction target by 2025.

Over 40% of NRRP investments are directed towards climate projects, and cohesion funds have supported hundreds of energy efficiency and sustainable infrastructure projects in large and small cities. From the thermal rehabilitation of buildings to the expansion of electric transport, Romania has taken clear, albeit uneven, steps towards climate modernization.

By 2050, Romania aims to reduce primary energy consumption by 25%, while final energy consumption is expected to fall by a further 28% compared to 2022 levels. These targets reflect a dedicated commitment to sustainability and a greener future.

Major Themes

- Accelerating renewable energy implementation: EPC, BoS, O&M, grid and storage readiness
- Regulatory and fiscal challenges
- Technological innovation: Battery technology, hydrogen fuel and carbon capture for cleaning offering non-toxic alternatives
- Policy and investment: Balancing growth and sustainability

Marketing Opportunities

PARTNER € 3000

Free participation for (4) four delegates
 Inclusion of logo in up to (6) six e-news blasts
 One presentation in any session of the conference
 Company name recognition as "Partner" in digital programme and on the event website
 Promotional material/corporate literature on the conference tables
 Company logo on the main stage backdrop
 Company logo on promotional printed conference materials
 Company Banner ups display in the conference area

LUNCH SPONSOR € 2500

Free participation for (3) three delegate
 One presentation in any session of the conference
 Inclusion of logo in up to (6) six e-news blasts
 Company name recognition as "Lunch Sponsor" in digital programme and on the event website
 Logo on promotional printed conference materials
 Company logo on the main stage backdrop
 Company Banner up display in the lunch area
 As Sponsor of the Lunch you will have the opportunity to address the attendees during the lunch time.

COFFEE BREAK SPONSOR € 1000

Free participation for (2) two delegate
 Company name recognition as "Coffee Break Sponsor" in digital programme and on the event website
 Banner up display in the coffee break room
 Promotional material/corporate literature on the coffee break tables

EXHIBITION PACKAGE € 1000

A manned stand where you can showcase and demonstrate your products.
 Exhibition space (2x2 m): display table with one chair
 Promotional items display, corporate literature display
 AC options
 Banner up display
 Company name recognition as "Exhibitor" in digital programme and on the event website
